They need SG-1 to enter replicator infested space, find the time dilation machine and reset it. When SG-1 land at the designated point, they meet 5 individuals, who control the replicators. The others reveal that they are an evolution of the replicators - composed of micro-cellular replicator blocks, and modeled on Reese, who

created the original replicators. These others have reset the time machine so that time is moving more quickly within this area of space - to allow them to evolve and build an enormous army that can invade the rest of space. The minds of the team are probed by the first 4 others. However, the last member of the others (called Fifth) seems reluctant - he is described as weak by First, the leader of the replicators. He was an attempt to model Reese more fully, but the mistake will not be repeated. Carter senses his reluctance to probe her mind, but invites him to do so - and they agree a plan. Fifth will reset the time dilation machine to run slowly, and he will escape with the SG team. While time is passing slowly for his brethren, the Asgard will have hundreds of years to fix the mistake in the others. Fifth has to leave later than the SG team to avoid arousing the suspicion of the others; Jack orders Carter to set the timer on the device to activate earlier than Fifth has been told. SG-1 escape successfully as the time dilation device reverses the trend within the area of space, and makes time run much more slowly. However, Fifth is caught by his brethren, and realises that Carter had broken her promise not to leave without him. Carter and Jonas regret using Fifth's humanity against him, but even though Jack seems uncomfortable, he declares that Fifth wasn't human, and they made the only correct choice.

The SG-1 team hadn't counted on a real dragon as the guardian, until one flies out, breathing fire. However, Daniel thinks the Sangraal probably is a hologram. They escape, but the dragon follows them outside. Ba'al admits not to know its secret name, while Daniel believes that the name probably holds power over it. While they guess, Cam thinks of luring the dragon to blow it up, but the C4 barely impresses its digestion. Daniel makes it disappear by using Morgan LeFay's name in Ancient, Ganos Lal. They find it had guarded the frozen 'grave' of the realm's arch-magician, Merlin (or rather, Myrrdin). Vala accidentally triggers a mechanism, which revives Merlin, when she approaches an Ancient repository device. In the meantime, the team is transported to other planet via the obelisk by the gate outside. Sam surmises that the gate and obelisk are programmed to dial automatically every few hours and transport them to a set of planets that are cut off from the rest of the gate system. Unfortunately, they can't dial out to any other planets either while the program is operating. When he comes to, Merlin seems to confuse the team and Ba'al, with Arthurian characters, but once convinced they are on the same side, he goes to work with the Ancient device to create the Sangraal. Merlin dies at the device, wishing them good luck and referring to one last task. Ba'al's stargate programming skills now seem their only chance. Daniel tries the Ancient repository device himself, but is knocked unconscious. Meanwhile,

Adria keeps searching for them via the stargate dialing program on a different planet- each time a bit quicker, being one planet behind them. While she is searching, the team is once again transported to other planet, minus Merlin's body. Daniel awakens with valuable memories from Merlin, and tries to construct the Sangraal using the repository device again in exhaustingly intense phases and finds it also gives him telekinetic powers. It also messes with Daniel's mind, having two different personalities and memories present (his own and Merlin's). Before he can finish the work, Sam and Ba'al disengage the dialing device, just as Adria's Ori troops arrive, allowing SG-1 to escape. Adria is able to capture Daniel before he can escape as well.

Her husband, Tomin, captures her but claims to not love her. He is ordered, as punishment for being deceived by her, to re-educate her. Sam and Cam are able to activate the functioning part of the device, so their building is cloaked from the Ori, who threaten the village leaders and discover and arrest Teal'c. Even after the remaining villagers bow in submission, the Prior decides to destroy everyone since he couldn't find Sam, which makes Tomin doubt his faith, inform Vala, and confront the Prior. The villagers want to sacrifice Teal'c, but one leader stops them. She insists upon abandoning the -killed- parallel Carter's line of work and pursues hiding the entire parallel Earth. It works! Even when the Ori fire at their position, nobody is hurt. The parallel Hank Landry is President, and three years prior had imposed permanent Martial Law. The more Carter learns about the perversion of civil liberties, the more she shifts her efforts, even when rewarded by a post as Presidential Defense Adviser, to restoring them, but thus incurs the active wrath of those in power who are eager to remain so. Time to get back, but how?

Season 10, Episode 14: [The Shroud](#)

Original Air Date—**30 January 2007**

Daniel Jackson, who was left behind fighting off Adria while the other SG1-members escaped through the Stargate, is found working as a Prior: the best in the business, who

doesn't need to use any threats to talk people into conversion to Origin. Hoping there is still some of his personality left, the team (plus General Jack O'Neill) kidnaps him. Daniel explains how he temporarily has Merlin's personality and knowledge in himself, and had deliberately allowed Adria to turn him into a Prior, while delaying to finish Merlin's weapon she'd wanted, meanwhile hoping to get an Ori ship for Earth's side. But time is running out, since the team took unexpectedly long to capture him. Still, the generals, Carter, and Vala are most reluctant to go along with releasing him and opening the wormhole he needs to bring the weapon through. Even the White House wants to kill him, or at best, keep him in stasis until he is reverted to his human nature by Merlin's genetic manipulation. But then his plan is wasted- unless the others can be trained to do it in his place (so only they are at risk, not the entire galaxy in case Daniel is Adria's Trojan Horse). After giving them the necessary information, Daniel suddenly frees himself while Richard Woolsey is with him and takes control of a space ship after beaming up Jack too, just after the others have undertaken their mission to Adria's lair, where Daniel, about to be genetically reverted, arrives just in time to tip the balance in favor of...

Sam gives a lecture on Air Force technological progress together with Dr. Bill Lee; a sniper nearly misses, but is taken out with an experimental weapon they'd brought along to demonstrate. Teal'c is injured by surprise at a Jaffa camp and successfully traps the killer to try again. Cam goes to his Kansas high school reunion and Vala succeeds in making him bring her along, pretending to be his accountant and partner. His still sexy former flame he'd believed out of his reach, Amy Vandenberg, is initially scared off by Vala, but, divorced and interested, explains she still has a secret crush on him. Alien bounty hunter Odai Ventrell assumes numerous classmates' appearances to kill him. Vala's failed rescue gets them both captured publicly, so he threatens to kill off reunion guests unless the other SG-1 members take their place, but they trick him using Chimera technology; they hope Netan's failure to eliminate them will rekindle the power struggle and Odai reacts surprisingly.

As soon as physically able, he swears to avenge them personally, suspecting the honor-less, ambitious warrior Arkad; General Landry refuses to sanction a killing mission without solid proof, but cannot stop Teal'c going it alone. Bra'tac explains to Daniel Arkad's sinister past, probably even murdering Teal'c mother. Information from resistance on another planet indicates Arkad is in league with the Ori and a plan to attack Earth. Arkad comes meet General Landry, offering to help defend Earth against the Ori, denying any part in the bombings, while defending Origin, incriminating a Jaffa sect. SG-1 is now ordered to find and stop at all cost Teal'c, who is using torture. But Teal'c, committed to killing Arkad, reaches his place, but is wounded, captured, and made to duel Arkad after it is confirmed he had killed Teal'c's parents.

Season 10, Episode 18: Family Ties

Original Air Date—**27 February 2007**

Stargate's HQ gets a video message from Vala's most unreliable father Jacek on the planet Robak- he claims to know about the late Arkad's plans to attack and blow up Earth, even about the several cloaked, naquadah-laden cargo ships in orbit, and offers details in exchange for sanctuary. General Landry asks Dr. Lam to help him resume contact with her mother Kim, his ex. Even after the cargoes are found and blown up, Vala abhors her dad's entry. The general asks her to go easy on him, realizing that he, too, neglected his daughter because of his career, even if Jacek's neglect was just criminal. When Cam and Daniel go tell Jacek he shouldn't scam people, he tricks them into talking to Vala for him. Vala goes over just for catharsis, telling him she's through picking up the pieces of his tricks, and he certainly keeps scamming- as Daniel also finds even with Terak, a Jaffa from an escaped cargo ship, who hopes to sell the naquadah. When they are apprehended, Jacek promises to help track it and override the rigging of the cargo ship. The Jaffa wait for Jacek and Vala, intending to eliminate them now that Terak is gone, but SG-1 saves them. Since there never was an override, he cheerfully flies away alone in the cargo ship, ignoring that his treachery was anticipated, it's a decoy...

Season 10, Episode 19: Dominion

Original Air Date—**6 March 2007**

Vala gambles, wins a cargo ship, but is found cheating; then Adria appears, throws everyone out and claims she has a new Ori fleet and an operational intergalactic Stargate. Vala tells her scary daughter how she helped Daniel, after a dream, reading the mysterious clava thessara-symbol's mystery, which led to a single planet address, where Athena's treasure house must be; after a disastrous visit there, the team refused to follow the next interpretation, fearing it's just a trap set up by Adria, so Vala is declared a security risk, grounded and confined to Area 51, but escapes through the Stargate. Adria takes her along

as she hears the team still plans to visit the address, by starship. Upon arrival, they are trapped by SG-1, which however finds itself surrounded by lord Ba'al's troops. Ba'al uses the rings to beam up Adria into an electromagnetic cage in his starship. Back on Earth, General Landry worries what damage the two might do together and wants Adria back. Daniel and Sam now show Vala she has been implanted by Galaran technology with fake recollections of her entire adventure 'til the meeting with Adria. Even though she claims that's impossible, Ba'al is confident he can take control over Adria's loyal Ori troops through her- by implanting a symbiote. The team finds Ba'al's Jaffa and clones killed by symbiote poison, except one Jaffa who secretly used tretonin. The team ring-beams from the cloaked Odyssey starship into Ba'al's, shoots him and captures Adria, but back on Earth, she is found to be under the control of his symbiote. Instead of just killing the evil double, they contact the Tok'ra which send Ta'Seem to extract the symbiote and replace it with a Tok'ra one, but Ba'al manages to poison Adria, who has to be put down. Suddenly Adria wakes up, uses mind-power barricading herself in the sick bay with Vala, tells them she needs time to prepare for ascension, as Daniel guesses outside, and succeeds before the team can cut their way in by blow torch. Nobody knows what this will mean for the future, especially as it remains uncertain whether the Ori are still alive. If not, she may have gained all their former powers, and at least one clone of Ba'al still remains...
